Re: Site Visit to Eagle Signal  
Davenport, Iowa  
EPA ID No. IAD051001337

Dear Mr. Erickson:

The purpose of this letter is to confirm that a Visual Site Inspection (VSI) will be conducted at the Eagle Signal facility in Davenport, Iowa. The VSI has been scheduled for May 13, 1992 and will be conducted by Camp Dresser McKee Federal Programs Corporation (CDM FPC), an authorized representative of the U. S. Environmental Protection Agency (EPA).

The Hazardous and Solid Waste Amendments of 1984 to the Resource Conservation and Recovery Act (RCRA) "require corrective action for all releases of hazardous waste or constituents from any solid waste management unit under this subtitle regardless of the time at which waste was placed in the unit" (42 USC § 6924(u)). The site visit planned for May 13, 1992 is part of EPA's investigation to determine if a release has occurred.

An integral portion of this investigation is the Visual Site Inspection. The VSI assists in determining the existence and location of Solid Waste Management Units (SWMUs). We are requesting permission for our contractor to conduct the VSI at your facility. No samples will be taken during the visit. However, photographs of each SWMU will be taken to document current waste management processes and existing conditions at the facility.

During the visit, we request a member of your staff to be available to assist in scheduling and coordinating VSI activities, conduct a facility tour, and assist with any questions regarding the technical aspects of the facility's solid waste flow and current and previous waste management practices. CDM personnel may require access to some of your files to review

**ACTIVITIES TO BE PERFORMED DURING THE  
VISUAL SITE INSPECTION FOR  
EAGLE SIGNAL  
DAVENPORT, IOWA**

**INITIAL CONFERENCE**

Upon arriving at the site, the VSI team will conduct a brief orientation meeting with facility representatives. The purpose of this meeting will be to explain the objectives of the VSI. Facility maps, permit numbers, and any other pertinent file information may be obtained at this time.

**VISUAL SITE INSPECTION**

The VSI team will then conduct a facility tour. As part of the health and safety plan, organic vapors will be monitored as the VSI team walks through the facility. Photographs of SWMUs and other significant features will be taken during the tour. Photographs and the VSI teams observations will be recorded in a field log book. All areas constituting former, existing or potential Solid Waste Management Units will be inspected.

**EXIT CONFERENCE**

Following the completion of the facility tour, a debriefing meeting with facility representatives will be conducted. The purpose of this meeting will be to inform the facility representatives of any imminent threats to human health or the environment observed during the tour. Recommendations will not be provided to the facility by CDM FPC. EPA will make any determinations after receiving the final report. CDM FPC will provide the facility with a receipt for all documents obtained at the facility.

and obtain copies, as necessary, of any documents pertaining to the facility's waste management processes and practices. Copied materials may need to be reviewed both on-site and subsequently at our offices in order to complete their evaluation. Prior to visiting the site, CDM may request information from you by letter so that copies of these documents will be available on the day of our visit.

During the VSI, EPA will be represented by Cecilia Masson and Patty Roberts. Cecilia and Patty are personnel with one of our contractors, CDM FPC. I have enclosed a brief outline of the activities to be performed during the VSI, copies of Letters of Introduction and our initial SWMU evaluations. If you have any questions, please contact me at (913) 551-7631.

Sincerely,

Kenneth V. Herstowski
